

PROCEDURES FOR VEHICLES ENTERING THE FARM

- 🕒 No vehicle carrying pigs should enter the unit at any time
- 🕒 All vehicles must have been disinfected and cleaned and before arrival
- 🕒 All pigs leaving the farm must do so via the loading ramp
- 🕒 Ideally the loading ramp should not be used for incoming pigs
- 🕒 The feed pipe connecting to the feed bins must be cleaned and disinfected before arrival and arrangements with all feed suppliers made for this to be completed – it is preferable to supply your own feed pipe
- 🕒 The driver must dip his feet close to the feed bin prior to activity on the farm or only use farm boots provided
- 🕒 If infectious diseases occur nearby special precautions will be needed
